Google Smart Home
Setup Guide
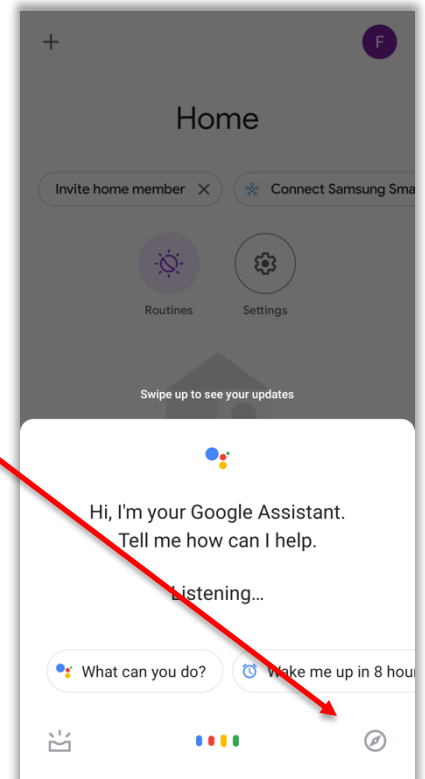

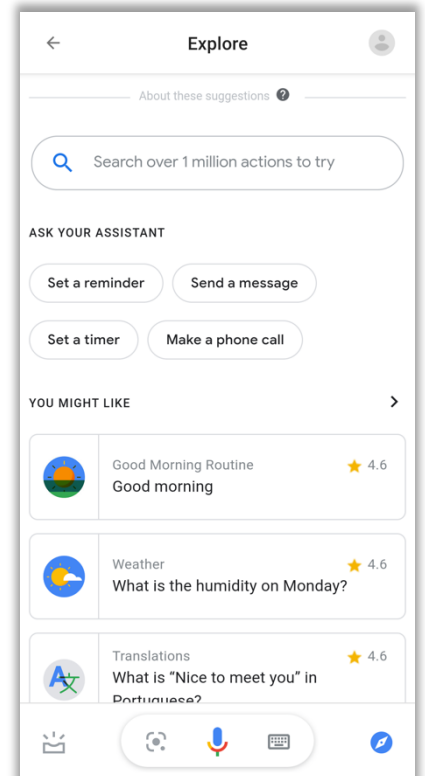

GOOGLE SMART HOME SETUP

Nexx Home integrated with Google Assistant allows you to control opening and closing of your **Nexx Garage** as well as controlling your **Nexx Plug** by voice command.
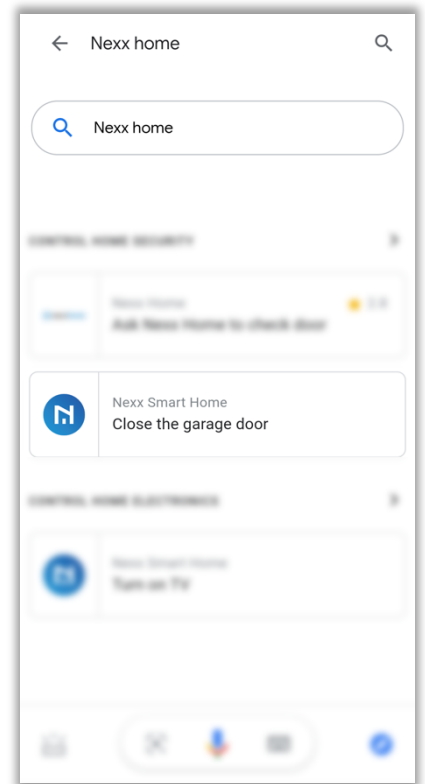

Following steps describe Nexx Smart Home setup:

1) Open the Google Home app on your phone, tap on the mic button in the middle and then tap on little compass icon.

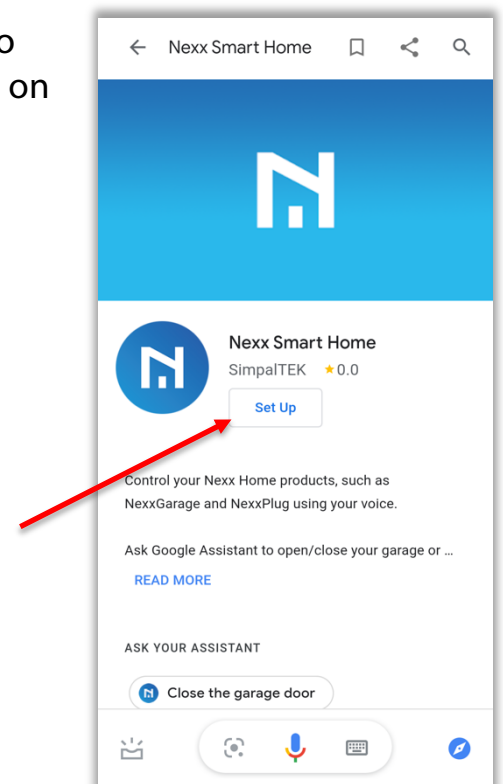

2) You'll land on explore section, where you can search for actions.
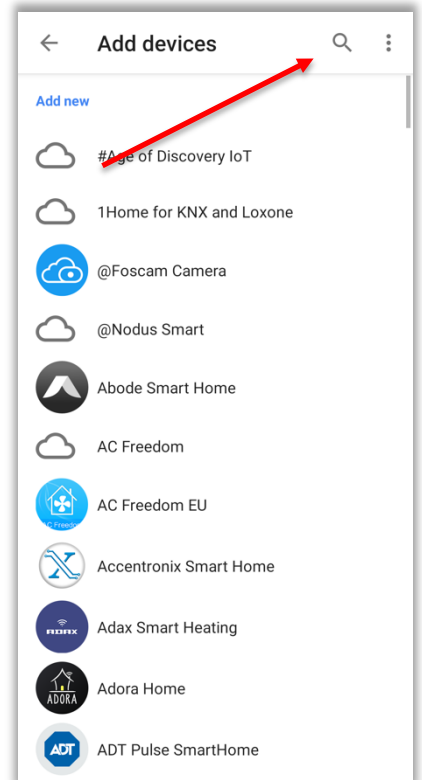

3) Select "Nexx Smart Home" from the results.

4) If this is your first time using Nexx Smart Home, you'll need to configure smart home action in order to start using it. So tap on 'Set Up' button to start the process.
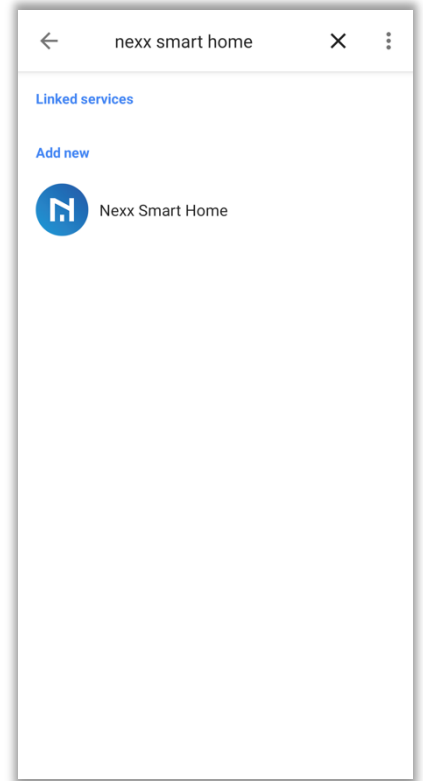

**5)** Tap on (+) sign to start Nexx Home account linking.

**6)** Use the search field to search for 'Nexx Smart Home'.

7) Once you've found the Nexx Smart Home action, tap on it and you'll be taken to authentication page.

8) You'll be asked for your Nexx Home account credentials. Enter your Nexx credentials to link your Nexx account with Google Home.
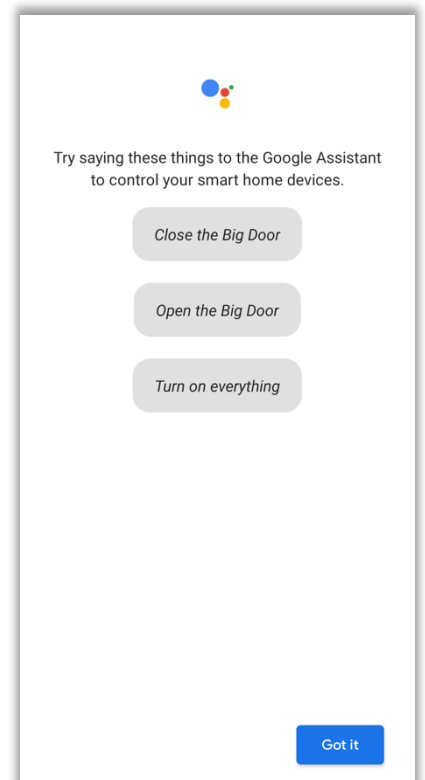

9) After successful authentication Google will fetch all your devices from your Nexx account. Tap 'Done' to complete the setup.

10) Google will display example commands that you can use.

The setup is complete now, you can start giving commands to your Google Home device.

GOOGLE ASSISTANT COMMANDS

Nexx Garage

- Hey Google, is home garage open
- Hey Google, open home garage
- Hey Google, close home garage
- Hey Google, open **Front Garage**
- Hey Google, close **Front Garage**
- Hey Google, is **Front Garage** open

Note: "Front Garage" is your assigned name for your garage door in Nexx Home app. You can replace the name in above command with the name of your garage door in NexxHome app.

Nexx Plug

- Hey Google, turn on home plug
- Hey Google, turn off home plug
- Hey Google, is plug turned on?
- Hey Google, turn on **My Lamp**
- Hey Google, turn off **My Lamp**
- Hey Google, is **My Lamp** turned off?

Note: "My Lamp" is your assigned name to your plug in NexxHome app. You can replace the name in above command with the name of your plug in NexxHome app.
